PROFESSIONAL SUMMARY

Lead Unity / Game Engineer with 10+ years building and shipping cross-platform mobile games — 50+ published titles with 100M+ combined installs. Currently leading the game department at Sybrid Technologies (Cobweb Games), owning technical direction and end-to-end delivery across Android and iOS. Deep expertise in Unity 2D/3D and C#, scalable game architecture (SOLID, dependency injection), real-time multiplayer, live operations, and monetization, backed by hands-on team leadership, code review, and mentoring. Comfortable across the full stack of live-service games: Firebase backends, CI/CD, analytics, and low-end-device performance optimization, plus WebGL, XR, and Web3 experience.

CORE SKILLS

Engines & Languages: Unity (2D/3D, URP), C#, Unity Editor Extensions, Shader Programming (HLSL / Shader Graph), Unreal Engine (Blueprints), Babylon.js, WebGL

Multiplayer & Backend: Real-time Multiplayer, Matchmaking, Photon, Mirror, Firebase (Firestore, Realtime Database, Authentication, Cloud Functions), REST APIs, Node.js

Architecture & Patterns: SOLID Principles, Dependency Injection (Zenject / VContainer), MVC / MVP, Addressables, Modular & Scalable Architecture, Microservices

Live Ops & Monetization: Live Operations, Remote Config, A/B Testing, In-Game Events, AdMob, Unity Ads, In-App Purchases, Firebase Analytics, GameAnalytics, Adjust

Platforms & Delivery: Android, iOS, WebGL, Windows; Cross-Platform / Unified Codebase; AR / VR (XR); Cloud Gaming / Pixel Streaming; CI/CD (Jenkins, Unity Cloud Build), Docker

Tools: Git, GitHub, Bitbucket, JIRA, Trello, Asana

Leadership: Team Leadership, Agile / Scrum, Product & Roadmap Management, Code Review, Technical Documentation, Mentoring

Also: Blockchain / Web3 (wallets, NFTs), Level Design, Performance Optimization, Player Retention Strategies

PROFESSIONAL EXPERIENCE

Lead Game Developer • Game Department Lead

Apr 2026 – Present

Sybrid Technologies (Cobweb Games)

Pakistan

- Lead the game department for the Cobweb Games (Sybrid Global LLC) mobile portfolio, owning technical direction, roadmap, hiring input, and end-to-end delivery across Android and iOS.
- Shipped multiple casual titles to Google Play in 2026, including Snake Jam Escape (tap-to-move snake-maze puzzle with hint / grid-vision boosters), Bus Jam Puzzle: Crowd Escape (crowd-sorting logic puzzle), and Happy Farm Life (3D farming & village-building simulation with a full trade economy).
- Leading development of Jackaroo Go, a real-time multiplayer marbles-and-cards board game featuring online matchmaking, 1v1 and 2v2 team modes, private rooms, in-game chat, and global leaderboards.
- Building Prison Escape (stealth puzzle-escape) and a continuous pipeline of casual / hyper-casual titles across arcade, rhythm, and card genres.
- Standardized Unity architecture, monetization (AdMob / Unity Ads / IAP) and analytics integration, and low-end Android performance budgets; mentor and coordinate the game team through best practices and code review.

Lead Game Engineer

Nov 2023 – Jun 2026

Imagination AI PTE. LTD. — 9D Technologies

Singapore / Remote

- Architected and delivered 30+ mobile games for iOS and Android, owning the full lifecycle from concept to store launch, with 5M+ combined downloads.
- Led a cross-functional team of 8+ developers and designers; introduced Agile practices that lifted sprint velocity ~40% and cut development cycles ~25%.

- Designed scalable game architecture with Zenject dependency injection and SOLID principles, reducing code coupling ~60% and improving maintainability.
- Integrated monetization (AdMob, Unity Ads, IAP), improving ARPDAU ~35% and retention ~28%; optimized performance for low-end Android (60+ FPS on 2GB-RAM devices).
- Built Firebase backends (real-time multiplayer, cloud saves, analytics, remote config) supporting 100K+ concurrent users; established code-review and documentation standards that cut bug rate ~45%.

Senior Unity Developer

Passion Pursuit Group

Oct 2023 – Present

Remote

- Architected and maintained live-service games with cloud backends, managing real-time updates and content delivery for an active player base.
- Shipped cross-platform titles on iOS, Android, and WebGL from a unified codebase; implemented Photon / Mirror multiplayer (16+ concurrent players) with cloud sync.
- Built live-ops systems (events, A/B testing, remote config) to optimize engagement and monetization; mentored junior developers.

Lead Game Developer

ExoDexa

Oct 2023 – Present

United States / Remote

- Led cloud-gaming titles with live-service architecture for seamless cross-device play; built a live-ops framework for real-time content, seasonal events, and progression without client updates.
- Delivered cross-platform (iOS / Android / WebGL) games from a shared codebase (~40% faster delivery); integrated Web3 (crypto wallets, NFTs).
- Optimized WebGL / cloud-streaming builds (60 FPS on mid-range hardware); collaborated with infra teams on scalable backends supporting 50K+ concurrent users.

Lead Unity Developer

Genesis Lab

Dec 2022 – Oct 2023

Islamabad, Pakistan

- Led cross-platform mobile games with 95% code reuse, reaching 500K+ downloads in the first month.
- Shipped live-service features (daily challenges, leaderboards, real-time events) that lifted retention ~35%; stood up CI/CD (Unity Cloud Build + Jenkins) and Firebase-backed services.
- Built an analytics framework tracking 50+ custom events, driving live-ops and A/B testing decisions.

Project Manager

FUNFITS (PVT) LTD.

Feb 2022 – Dec 2022

Pakistan

- Managed the full product lifecycle for 8 mobile game titles across design, development, QA, and marketing; delivered on time with ~95% schedule adherence using KPI tracking and data-driven planning.

Technical Lead

OZI Technology

Jul 2021 – Jan 2022

Lahore, Pakistan

- Provided technical and architectural leadership for Unity projects, setting coding standards and workflows; ran technical interviews to build a high-performing team.

Production Lead

The Gaminators! Group

Jul 2020 – Jul 2021

Lahore, Pakistan

- Oversaw the production pipeline for multiple concurrent projects (12+ people); built tooling and automation that cut manual processes ~60%.

Unity Developer

Spartans Global

Feb 2020 – Jul 2020

Rawalpindi, Pakistan

- Built Android games focused on performance and UX; implemented mechanics, UI systems, and third-party ad / analytics SDKs.

Unity 3D Developer

Jolta Technologies

Aug 2019 – Jan 2020

Rawalpindi, Pakistan

- Created 3D mobile games in Unity / C#; optimized the asset pipeline alongside designers and artists.

Senior Unity 3D Game Developer

Oct 2018 – Jul 2019

Belta Technologies

Rawalpindi, Pakistan

- Led development and shipped Unity / C# titles for clients; optimized for broad Android device compatibility.

Unity Developer

Mar 2017 – Sep 2018

Knock Solutions

Islamabad, Pakistan

- Shipped multiple Android titles in Unity 3D with a focus on engagement, optimization, and platform best practices.

Unity 3D Developer

Mar 2016 – Mar 2017

Arkdotnet

Islamabad, Pakistan

- Built Unity 3D games and applications; established foundational best practices in mobile development and C#.

Unity 3D Developer (Freelance)

Jan 2015 – Mar 2018

Self-Employed

Islamabad, Pakistan

- Delivered custom game projects end-to-end for clients across casual, puzzle, and action genres.

SELECTED SHIPPED TITLES & PROJECTS

New (Cobweb Games / Sybrid): Snake Jam Escape · Bus Jam Puzzle: Crowd Escape · Happy Farm Life: Farming Game · Jackaroo Go (multiplayer, in development) · Prison Escape (in development).

Earlier notable: Sniper Shooting (10M+ downloads), Idle Restaurant Tycoon, Wild Run Endless Chase, Sibling Adventure, plus XR / metaverse work (V.I.R.E, Virtual World, Virtualist).

KEY ACHIEVEMENTS

- Published 50+ games across iOS and Android with 100M+ combined downloads.
- Achieved Top-10 ranking in the Google Play Casual category for multiple titles.
- Reduced average crash rate from 2.5% to 0.3% through systematic debugging and performance optimization.
- Improved team productivity ~40% via Agile methodologies and automated workflows.
- Mentored 15+ junior developers who progressed to mid-level and senior roles.

EDUCATION

B.S. in Software Engineering

2012 – 2016

COMSATS Institute of Information Technology

Islamabad, Pakistan

ADDITIONAL INFORMATION

Languages: English (Professional Proficiency), Urdu (Native).

Interests: Game design theory, real-time multiplayer systems, AI/ML in games, XR and emerging technologies.

Availability: Open to remote and relocation opportunities.
