## PROFESSIONAL SUMMARY

Lead Unity/Game Engineer with 8+ years of experience specializing in cross-platform game development, cloud gaming infrastructure, and live service operations. Expert in Unity 2D/3D development for iOS, Android, and WebGL platforms with proven track record of delivering 50+ published games across multiple portfolios. Skilled in architecting scalable cloud-based game services, implementing live operations frameworks, and managing real-time content delivery systems. Combines strong technical expertise in C#, Firebase, and distributed systems with strategic product management capabilities and team leadership experience.

## TECHNICAL SKILLS

**Game Development:** Unity 2D/3D, C#, Unity Editor Extensions, Shader Programming, WebGL, Cross-Platform Development

**Cloud & Live Services:** Cloud Gaming Infrastructure, Live Operations, Real-time Content Updates, Event Management, A/B Testing

**Architecture & Patterns:** SOLID Principles, Dependency Injection (Zenject/VContainer), MVC/MVP, Microservices, Scalable Backend

**Backend & Integration:** Firebase (Realtime Database, Firestore, Authentication), REST APIs, Cloud Functions, Multiplayer (Photon, Mirror)

**Monetization & Analytics:** AdMob, Unity Ads, In-App Purchases, Firebase Analytics, GameAnalytics, Adjust, Live-Ops Metrics

**Tools & Platforms:** Git, GitHub, Bitbucket, JIRA, Trello, Asana, CI/CD (Jenkins, Unity Cloud Build), Docker

**Cross-Platform Deployment:** iOS, Android, WebGL, Windows, Cloud Gaming Platforms, Unified Codebase Architecture

**Leadership & Management:** Agile/Scrum, Team Leadership, Product Management, Technical Documentation, Code Review

**Additional Skills:** Blockchain/Web3 Integration, Level Design, Performance Optimization, Player Retention Strategies

## PROFESSIONAL EXPERIENCE

- Lead Game Engineer** November 2023 – Present  
*Imagination AI PTE. LTD. — 9D Technologies* *Singapore / Remote*
  - Architected and delivered 30+ mobile games for iOS and Android platforms, managing complete development lifecycle from concept to App Store/Google Play launch with combined 5M+ downloads
  - Led cross-functional team of 8+ developers and designers, implementing Agile methodologies that increased sprint velocity by 40% and reduced development cycles by 25%
  - Designed and implemented scalable game architecture using Zenject dependency injection and SOLID principles, reducing code coupling by 60% and improving maintainability
  - Integrated advanced monetization strategies including AdMob, Unity Ads, and IAP systems, achieving 35% increase in ARPDAU and 28% improvement in retention metrics
  - Optimized game performance for low-end Android devices (60+ FPS on devices with 2GB RAM) through profiling, asset optimization, and memory management techniques
  - Implemented Firebase backend solutions including real-time multiplayer, cloud saves, analytics, and remote configuration, supporting 100K+ concurrent users
  - Established code review processes and technical documentation standards, reducing bug rate by 45% and improving team productivity
  - Portfolio: 9D Technologies Games — ILK Teknoloji Games
- Senior Unity Developer** October 2023 – Present  
*Passion Pursuit Group* *Remote*
  - Architected and maintained live service games with cloud-based backend infrastructure, managing real-time updates and content delivery for active player base
  - Developed cross-platform games deployed on iOS, Android, and WebGL, ensuring consistent gameplay experience across all platforms

- Implemented multiplayer networking solutions using Photon and Mirror, supporting real-time gameplay for 16+ concurrent players with cloud synchronization
  - Built live operations systems including event management, A/B testing, and remote configuration to optimize player engagement and monetization
  - Mentored junior developers on Unity best practices, C# optimization techniques, and cross-platform development considerations
- Lead Game Developer** October 2023 – Present  
*ExoDera* *United States / Remote*
  - Spearheaded development of cloud gaming solutions with live service architecture, supporting seamless gameplay across multiple devices and platforms
  - Designed and implemented live operations framework for real-time content updates, seasonal events, and player progression systems without client updates
  - Built cross-platform games for iOS, Android, and WebGL with unified codebase, reducing development time by 40% through shared architecture
  - Integrated blockchain technology with cryptocurrency wallet systems and NFT functionality for Web3 gaming experiences
  - Optimized WebGL builds for browser-based gaming with cloud streaming capabilities, achieving 60 FPS performance on mid-range hardware
  - Collaborated with cloud infrastructure teams to implement scalable backend services supporting 50K+ concurrent users
- Lead Unity Developer** December 2022 – October 2023  
*Genesis Lab* *Islamabad, Pakistan*
  - Led development of cross-platform mobile games for iOS and Android with 95% code reusability, achieving 500K+ downloads within first month
  - Implemented live service features including daily challenges, leaderboards, and real-time events to boost player retention by 35%
  - Established CI/CD pipeline using Unity Cloud Build and Jenkins, enabling rapid iteration and cloud-based automated testing
  - Built cloud-connected game services with Firebase for real-time data synchronization, player profiles, and cross-device progression
  - Implemented comprehensive analytics framework tracking 50+ custom events, providing actionable insights for live operations and A/B testing
- Project Manager** February 2022 – December 2022  
*FUNFITS (PVT) LTD.* *Pakistan*
  - Managed complete product development lifecycle for 8 mobile game titles, coordinating between design, development, QA, and marketing teams
  - Defined product roadmaps and sprint planning, successfully delivering projects on time with 95% adherence to schedule
  - Implemented KPI tracking and data-driven decision making processes, improving team efficiency and product quality metrics
- Technical Lead** July 2021 – January 2022  
*OZI Technology* *Lahore, Pakistan*
  - Provided technical leadership and architectural guidance for Unity projects, establishing coding standards and development workflows
  - Conducted technical interviews and evaluated candidates, building high-performing development team
- Production Lead** July 2020 – July 2021  
*The Gaminators! Group* *Lahore, Pakistan*
  - Oversaw production pipeline for multiple concurrent game projects, managing resources and timelines across 12+ team members
  - Implemented production tools and automation scripts that reduced manual processes by 60%
- Unity Developer** February 2020 – July 2020  
*Spartans Global* *Rawalpindi, Pakistan*
  - Developed mobile games for Android platform with focus on performance optimization and user experience
  - Implemented game mechanics, UI systems, and integrated third-party SDKs for ads and analytics
- Unity 3D Developer** August 2019 – January 2020  
*Jolta Technologies* *Rawalpindi, Pakistan*

- Created 3D mobile games using Unity and C#, focusing on engaging gameplay and smooth performance
- Collaborated with designers and artists to implement game features and optimize asset pipeline
- **Senior Unity 3D Game Developer** October 2018 – July 2019  
*Belta Technologies* *Rawalpindi, Pakistan*
  - Published and developed games for clients and company using Unity and C# scripting
  - Led development efforts for multiple game projects, managing timelines and technical implementation
  - Optimized games for Android devices, ensuring compatibility across wide range of hardware specifications
- **Unity Developer** March 2017 – September 2018  
*Knock Solutions* *Islamabad, Pakistan*
  - Specialized in Unity 3D mobile game development for Android platform, creating captivating gaming experiences
  - Pushed technical boundaries through performance optimization and innovative gameplay mechanics
  - Developed multiple published titles focusing on user engagement and platform best practices
- **Unity 3D Developer** March 2016 – March 2017  
*Arkdotnet* *Islamabad, Pakistan*
  - Developed Unity 3D games and applications, gaining foundational experience in game development
  - Learned industry best practices for mobile game development and C# programming
- **Unity 3D Developer (Freelance)** January 2015 – March 2018  
*Self-Employed* *Islamabad, Pakistan*
  - Delivered custom game development projects for various clients, managing complete development lifecycle
  - Built diverse portfolio of mobile games across multiple genres including casual, puzzle, and action games

## KEY ACHIEVEMENTS

---

- Published 50+ games across iOS and Android platforms with combined downloads exceeding 7 million users
- Achieved Top 10 ranking in Casual Games category on Google Play Store for multiple titles
- Improved team productivity by 40% through implementation of Agile methodologies and automated workflows
- Reduced average crash rate from 2.5% to 0.3% through systematic debugging and performance optimization
- Successfully mentored 15+ junior developers who progressed to mid-level and senior positions

## EDUCATION

---

- **COMSATS Institute of Information and Technology** Islamabad, Pakistan  
*Bachelor of Science in Software Engineering* *2012 – 2016*

## ADDITIONAL INFORMATION

---

**Languages:** English (Professional Proficiency), Urdu (Native)

**Availability:** Open to relocation and remote opportunities

**Interests:** Game Design Theory, Emerging Technologies in Gaming, AI/ML in Game Development, Level Design
